
Spartan Metals Doubles Tungstania Exploration and Mining Claims

- **Commences Trading on the Frankfurt Stock Exchange**

Vancouver, Canada, November 25, 2025 – Spartan Metals Corp. (“**Spartan**” or the “**Company**”) (TSX-V: W OTCQB: SPRMF | FSE: J03) is pleased to announce that it has significantly expanded its land position at its 100% owned Eagle Tungsten-Silver-Rubidium Project (“**Eagle**” or “**Project**”) in eastern Nevada, by staking an additional 201 claims at the Tungstania claim block (Figure 1).

The 201 new claims cover 4,054 highly prospective new acres adjacent to existing Tungstania claims, more than doubling the previous acreage.

Highlights

- Staked 201 new claims that increased the total Tungstania claims to 353 covering 7,131 acres
- The new claims follow observations from recent [field exploration program](#) that indicated potential continuation of mineralization from the past-producing Tungstania tungsten-silver mine that potentially contain additional high-grade tungsten-silver-rubidium veins plus Carbonate Replacement Deposit (CRD) mineralization containing high-grade silver, lead, and copper
- The previously announced [field exploration program](#) that includes soil and rock sampling, mapping, and geophysics will also cover the newly staked claims

Brett Marsh, Spartan’s President and CEO, states, “*The addition of these new claims further underscores the significant exploration potential and mineralization endowment we see at Tungstania and allows us to consolidate our land position at the Eagle Project. The exploration team identified these areas as having high potential to contain mineralization similar to what we already encounter at Tungstania. This expanded footprint will allow us to evaluate the district-scale potential for high-grade critical metals at the Eagle Project.*”

Spartan Metals Commences Trading on the Frankfurt Stock Exchange

Spartan Metals is pleased to announce that the Company’s common shares have commenced trading on the Frankfurt Stock Exchange (the “**FSE**”) under the symbol “J03”.

The Company’s common shares are also listed on the Toronto Venture Exchange under the symbol “**W**” and the OTCQB Venture Market as “**SPRMF**”. The FSE is one of the world’s leading international stock exchanges by revenue, profitability, and market capitalization and is the largest of Germany’s stock exchanges.

Mr. Marsh comments, “*As Spartan Metals grows, this listing on the Frankfurt Stock Exchange is another important milestone for us as we continue to expand and diversify our shareholder base.*”

About The Eagle Project

The Eagle Project presents a unique opportunity to delineate one of the largest and highest-grade Tungsten (“W”) and Rubidium (“Rb”) districts in the United States. The Project consists of the past-producing high-grade Tungstonia and Rees/Antelope tungsten (W-Cu-Ag) mines. Operations at these mines were from 1915 to 1942 with intermittent small-scale production occurring until 1956. Tungsten production from these two mines totaled 8,379 units at grades between 0.6%-0.9% WO₃ (1).

The Project is ~36.5 km² in size and located approximately 120 kilometers northeast of the town of Ely, in the Kern Mountains of White Pine County, Nevada. The Project covers 9,033 acres consisting of 445 Bureau of Land Management (BLM) unpatented lode mining claims.

Three deposit types are present at Eagle; Porphyry, Skarn, and Carbonate Replacement (CRD) that contain significant or anomalous grades of Tungsten (W), Silver (Ag), and Rubidium (Rb) plus Cu-Sb±Au-Pb-Zn-Bi-As across three project focus areas that also includes the potential to recover W-Rb-Ag from the legacy Tungstonia Mill Tailings.

The technical information contained in this news release has been prepared under the supervision of, and approved by Brett R. Marsh, CPG. Mr. Marsh is President and CEO of Spartan Metals Corp. and a “qualified person” as defined under National Instrument 43-101 – *Standards of Disclosure for Mineral Projects*.

About Spartan Metals Corp.

Spartan Metals is focused on developing critical minerals projects in well-established and stable mining jurisdictions in the Western United States, with an emphasis on building a portfolio of diverse strategic defense minerals such as Tungsten, Rubidium, Antimony, Bismuth, and Arsenic.

Spartan’s flagship project is the Eagle Project in eastern Nevada that consists of the highest-grade historic tungsten resource in the USA (the past-producing Tungstonia Mine) along with significant under-defined resources consisting of: high-grade rubidium; antimony; bismuth; indium; as well as precious and base metals. More information about Spartan Metals can be found at www.SpartanMetals.com

Forward Looking Statements

This news release contains statements that constitute “forward-looking statements.” Such forward looking statements involve known and unknown risks, uncertainties and other factors that may cause the Company’s actual results, performance or achievements, or developments in the industry to differ materially from the anticipated results, performance or achievements expressed or implied by such forward-looking statements. Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words “expects,” “plans,” “anticipates,” “believes,” “intends,” “estimates,” “projects,” “potential” and similar expressions, or that events or conditions “will,” “would,” “may,” “could” or “should” occur. Forward-Looking Information in this news release, Spartan has applied several material assumptions, including, but not limited to, assumptions that: the current objectives concerning the Company’s projects can be achieved and that its other corporate activities will proceed as expected; that general business and economic conditions will not change in a materially adverse manner; and that all requisite information will be available in a timely manner.

Although the Company believes the forward-looking information contained in this news release is reasonable based on information available on the date hereof, by their nature forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements, or other future events, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. By their nature, these statements involve a variety of assumptions, known and unknown risks and uncertainties and other factors, which may cause actual results, levels of activity and achievements to differ materially from those expressed or implied by such statements.

Examples of such assumptions, risks and uncertainties include, without limitation, assumptions, risks and uncertainties associated with general economic conditions; adverse industry events; future legislative and regulatory developments; the Company’s ability
